

PROFESSIONAL AMBASSADOR PROGRAM

Working with those who suffer from lack of sleep or sleep related problems can be just as challenging as if we are suffering from the same experiences ourselves. Having the right tools not only supports the work that we do but provides additional opportunities for clients to see relief. Dreamapad has a history working directly with Occupational Therapists, Speech Therapists, Physical Therapists, Doctors, Psychologists, and many others to provide effective solutions to not only help their clients' sleep needs, but also mental and physical needs as well. At Dreamapad, we love partnering with professionals to provide exceptional products and services, while obtaining valuable, direct feedback about the community and how we can incorporate this information and education to further our positive impact on your clients.

Dreamapad products use a unique, patented technology which sends soothing sounds and sleep music through gentle vibrations to your body, triggering a natural calming response. Allowing your brain to slow down, relax, and send you off to dream quickly for a quality night's sleep. Enjoy a comfortable, effective solution that won't disrupt others. Our products are designed to help those with sleep problems that may be caused by stress, anxiety, restlessness, PTSD, autism, ADHD, traumatic brain injury, and other conditions.
