Sensory & SilentSound Spaces

Sense, feel, think, perceive, create, learn, balance, relax, enjoy...

What if you had spaces in your school, rehab, nursing home or workplace, in which you could stimulate your senses, be creative, move your body, and learn through play?

Then, relax, balance your systems, calm your body, clear your mind and recharge vitality before getting back to your regular daily activities?

What if you could create such spaces in your place ?
