BenefactorCloud

Looking for a Grant Management system which is tailored to your exact requirements with the capacity to evolve over time?

We've been providing 100's of customers within the UK Charitable and NFP sector with successful Grant Management solutions for over 25 years. We understand the necessity for fast and efficient software that offers customised configuration, has the ability to adapt and can be accessed on demand.

BenefactorCloud

Features & Benefits

"Our decision to choose Gallery was not only down to pricing but the overall package which was on offer, which included the engagement from the team. Despite other companies offering similar software, their main focus was more commercial businesses, whereas with Gallery, their only focus is charities, and it was clear that with their experience, the challenges our organisation faced would be much better understood."

Sally Burtles
Chief Executive
The Lister Institute of Preventative Medicine

Features

BenefactorCloud is a comprehensive Grants Management System with:

- web application with 24/7 availability
- customisable online applications
- eligibility testing & scoring
- application status & lifecycle tracking
- key decision makers/assessor online review screens
- secure messaging & file uploads
- templated letters and emails
- automation using customisable workflows
- dashboards and full reporting suite
- grantee outcome reporting
- payment and budget tracking
- task reminders and deadlines
- tracked communications/audit trails
- user screens designed to meet WCAG 2.1 standards

Benefits

Streamlined Administration

BenefactorCloud is one central system which includes a full range of modules providing extensive functionality which can track and manage whatever information your staff, clients and funders need. An easy-to-use online application portal allows you to schedule grant rounds and downloads applicant data securely and automatically into the system. Standard and Bespoke analytical reports can be produced quickly, along with the assessment and grantee monitoring. Our clients report a 90% reduction in administration time.

"Future Proof" Technology

We stay up to date with the latest technological advances, developing and improving our products to continually work for your organisation. The "white label" UI design means you can fully customise the look and feel of the software to your brand and easily adapt it in the future. Continuous security testing and GDPR privacy controls provides peace of mind that data is secure and that your company is compliant with regulatory standards.

Support, Training and Implementation

Gallery Partnership have been working grant organisations for over 25 years delivering robust, cost-effective solutions. Our highly experienced grants team makes implementation straightforward with minimal impact on you and your IT department, plus our personalised training and dedicated helpline means we continually support you post delivery.

Taking care of IT... Support, Software and Solutions for Charities
