

DREAMPAD: PIONEERS IN SOUND TECHNOLOGY FOR RELAXATION AND SLEEP

Our unique, patented technology is the ultimate sound therapy experience improving your sleep each and every night.

Hear sound in a whole new way! No more sound machines, uncomfortable earbuds, or headphones while trying to fall asleep. Simply lay your head down on a Dreamapad pillow (or your own) and drift away listening to soothing sleep music through gentle vibrations, triggering a natural calming response within your body. Reduce stress and anxiety for a quality night's sleep with our comfortable, effective relaxation and sleep solution that won't disrupt others.

The Dreamapad pillow was originally designed as a clinical product to help children with sleep problems caused by autism, ADHD, traumatic brain injury, and other conditions. Soon, parents began asking for the Dreamapad because it was so effective for their kids!

Our sound technology, with the right music, can calm your nervous system and help get you to sleep faster and stay asleep longer.

PATENTED BONE CONDUCTIVE TECHNOLOGY

Our voice carries through the airwaves and enters our outer ear; simultaneously, the vibration from our voice box is carried internally, by our bones (which are excellent conductors) to the inner ear. Dreampad products replicate this natural process by playing audio through transducers converting sounds into a type of vibration.

REDUCE STRESS AND ANXIETY

Created to help those with sleep problems that may be caused by stress, anxiety, restlessness, PTSD, autism, ADHD, traumatic brain injury, and other conditions Dreampad products safe for all ages.

ALL NATURAL, SENSORY EXPERIENCE

Based on the natural conductivity of the human body, our patented technology sends soothing sounds through gentle vibrations, triggering a natural calming response within the nervous system. This allows the brain to slow down, relax, and send users off to dream quickly for a quality night's sleep.

FREEDOM AND COMFORT

Love the freedom of not having to wear headphones or earbuds while in bed or having a pesky sound machine the whole house can hear.

CONNECT TO ANY STREAMING PLATFORM

Designed for users to have a choice in how they want to listen to audio, therefore there are no music players or other electronic devices inside Dreampad products.

JUST FOR YOU!

Because of our patented technology, unlike traditional speakers, the sound produced does not carry outside the pillow (unless the volume is set really high).
