

theratrak

Your virtual therapy assistant

theratrak

Theratrak is a digital platform that supports allied health therapists to **capture and digitise meaningful information** from therapy sessions and then **track and monitor them from a distance**.

Theratrak is comprised of 3 digital platforms that all work together to **support adherence to therapy treatments outside of clinical sessions**.

1. Therapist Mobile App
2. Clinic Portal
3. Participant Mobile App

Expand the reach of your therapy sessions

Start your **free trial** today

1. Therapist Mobile App

The app gives therapists access to over **250 activity cards** and is designed to support them in every step of their clinical treatment.

Capture relevant media directly from your sessions and customise your participant's treatment plan.

Fits into your workflow and reduce time spent on admin.

Password and pin protected to ensure security.

Available on both iOS and Android devices

2. Clinic Portal

Created to manage and **track participant's progress** as well as therapists to **customise activities** to fit their needs.

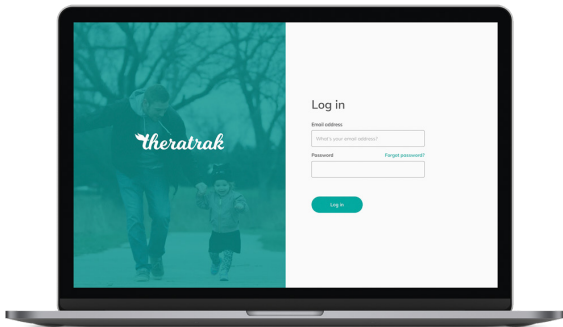

Securely connect your clinical team.

Easily access and track clinical treatments.

Create custom content specific to your clinical team and participants.

3. Participant Mobile App

A fun, secure app that allows participants to access their **individually tailored treatment programs**.

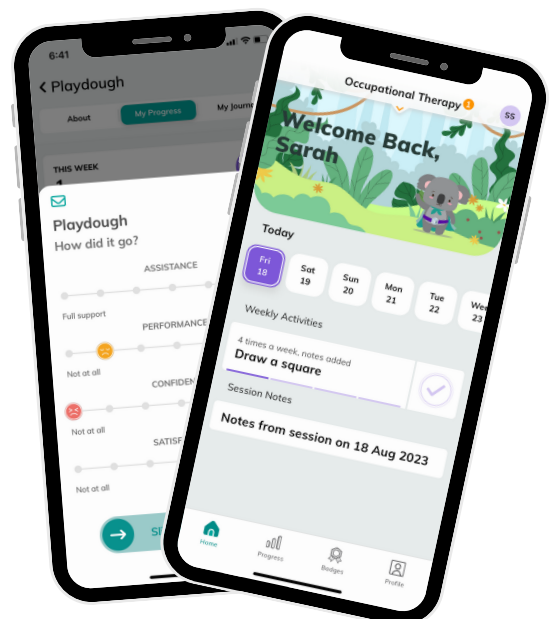

Secure access to prescribed treatment plans across multiple disciplines.

Tailored specifically to each participant and their family's therapy goals.

Earn rewards, track progress and give feedback about treatments with this easy to use App.

Laura Simmons

Laura founded Theratrak in 2018 with the aim to support more families of children living with all abilities to better access healthcare and lead more independent lives. Laura has worked as an occupational therapist across Sydney. She has experienced some of the many challenges that both therapists and families face with adherence to therapy programs outside of clinical sessions and what it means when treatment plans aren't followed through with.

Laura's vision is to increase the independence of all children and families living with disabilities. Improve access and reduce the global economic burden of healthcare through leveraging the incredible benefits of technology.
